LED Flex Light • UltraBright

Applications:
Unique and versatile illumination for commercial, residential and landscape applications

The **UltraBright** Flex Light family is the most popular product because of its high light output and low energy consumption. With 4.4 watts per foot in a compact format it can take on a more serious role for tasks, displays or coves in any application indoor or outdoor. When it's combined with our custom extrusion options it transforms into a new Avatar and enters the sphere of professional looking lighting with a finished appearance. Whether you are looking to light up the inside or outside our UltraBright Flex Light is an excellent light source.
